‘Teenagers problems’ is an unavoidable
thing

Especially about messy rooms...

Secondly, most of teenagers have a fear of loneliness. Most of them have low self-esteem and they are not satisfied with their appearance.

Some time ago, I conducted a survey in my class. It contained only three questions about using computers, learning subjects and do without the Internet. So we can see the following results:

The second diagram

■ one hour ■ two hours ■ more then two hours

The third diagram

■ can't at all ■ one hour ■ one week ■ one month ■ three months

Clearly, there are a lot of problems in teenagers' lives. However, there are some wonderful moments that can happen only when you are young. Adults often remember those years, the years when they were young with pleasure. And soon all problems will go away, and there will be only good impressions in the memory.
