# This is a slide title

- Here you have a list of items
- And some text
- But remember not to overload your slides with content

Your audience will listen to you or read the content, but won't do both.

# Big concept

Bring the attention of your audience over a key concept using icons or illustrations

You can also split your content

### White

Is the color of milk and fresh snow, the color produced by the combination of all the colors of the visible spectrum.

### Black

Is the color of coal, ebony, and of outer space. It is the darkest color, the result of the absence of or complete absorption of light.

## In two or three columns

### Yellow

Is the color of gold, butter and ripe lemons. In the spectrum of visible light, yellow is found between green and orange.

### Blue

Is the colour of the clear sky and the deep sea. It is located between violet and green on the optical spectrum.

### Red

Is the color of blood, and because of this it has historically been associated with sacrifice, danger and courage.

A picture is worth a  
thousand words

A complex idea can be  
conveyed with just a  
single still image,  
namely making it  
possible to absorb  
large amounts of data  
quickly.

#### Where to Get Maps

Good maps are in general extraordinarily easy to obtain. Even the small-scale maps distributed by gas stations are generally pretty good.

Sectional maps, particularly those government publications, are inexpensive in the extreme. Furthermore, most suppliers will furnish upon request for detailed lists of exactly what they have available.

Maps of whole portions of the United States from the U. S. Geological Survey may be secured upon, D.C. For maps of areas west of the Mississippi contact the U. S. Geological Survey, Federal Center, Denver, Colorado.

For maps of natural forest areas, write the Forest Service, Department of Agriculture, Washington, D.C. Maps of the Great Lakes and Lake Survey, Federal Building, Detroit, Michigan. Canadian maps may be obtained from the U. S. Civil publicans officers located in the various provinces in Ottawa, and from the Map Distribution Bureau in Ottawa, and from the Map Distribution Office, Department of Mines and Technical Surveys, which is also located in Ottawa, Ontario.

For governmental maps of Mexico, write: Dirección de Geografía y Meteorología, Tacamarcos, D. F., Mexico. Two private sources for foreign maps are: The National Geographical Society, 11th and M Streets, Washington, D.C., and the International Map Company, 90 West Street, New York, N.Y.

#### Why contour maps are preferable

Contour maps are by far the most valuable for wilderness use, indicating as they do valleys, canyons, mountains, and other such geographical features in terms of elevations. Consulting such

maps in strange country can save one an exhausting amount of unnecessary climbing, descending, and then scaling again. Traveling by compass in a straight line, even when possible, is often not advisable. In mountainous country, for example, we soon learn that on more than one occasion both time and strength can be conserved by circling several miles along an open ridge instead of striking a small fraction of the distance straight across a deep ravine to the one destination.

Want big impact?  
Use big image.

Use charts to explain your ideas

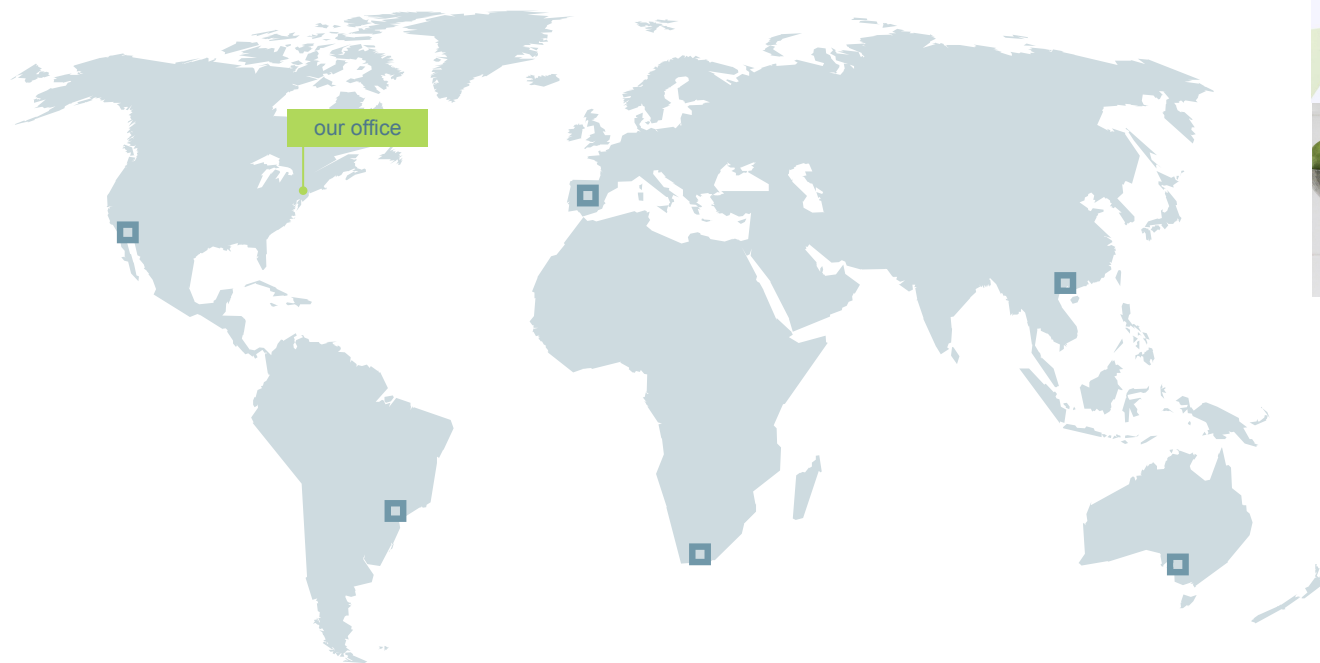

And tables to compare data

	A	B	C
Yellow	10	20	7
Blue	30	15	10
Orange	5	24	16

## SlidesCarnival icons are editable shapes.

This means that you can:

- Resize them without losing quality.
- Change line color, width and style.

Isn't that nice? :)

Examples:

PASSION  
DRIVE

## Now you can use any emoji as an icon!

And of course it resizes without losing quality and you can change the color.
