

Bulldozer

Bulldozer is a strong machine it is designed for work related to the mining industry.

She pushes and distributes the rough workings.

It has a powerful engine that takes on all the load.

he has one hundred
and four hundred
horsepower Of
course there are more
but this is the most
profitable option

The bulldozer also works in the mine and carries out a heavy work.

Without it, it will be
difficult to work in mine
workings

Thank you
for

attention
