

Численное решение уравнения переноса на вычислительной системе с общей памятью

Национальный исследовательский Томский государственный университет

Лещинский Д. В., Данилкин Е. А., Старченко А. В.

Физико-математическая постановка задачи

$$\frac{\partial \rho \Phi}{\partial t} + \frac{\partial \rho U \Phi}{\partial x} + \frac{\partial \rho V \Phi}{\partial y} + \frac{\partial \rho W \Phi}{\partial z} = \frac{\partial}{\partial x} \left(K_{xy} \frac{\partial \Phi}{\partial x} \right) + \frac{\partial}{\partial y} \left(K_{xy} \frac{\partial \Phi}{\partial y} \right) + \frac{\partial}{\partial z} \left(K_z \frac{\partial \Phi}{\partial z} \right) + S_{\Phi}; \quad (1)$$

$$z = h(x, y): K_z \frac{\partial \Phi}{\partial z} = \alpha(\Phi - \Phi_w); \quad (2)$$

$$z = H: K_z \frac{\partial \Phi}{\partial z} = \gamma_{\Phi}; \quad (3)$$

$$x = -L; x = L: \frac{\partial \Phi}{\partial t} + C_{\Phi}^x \frac{\partial \Phi}{\partial x} = \frac{\partial \Phi_S}{\partial t} + C_{\Phi}^x \frac{\partial \Phi_S}{\partial x}; \quad (4)$$

$$y = -L; y = L: \frac{\partial \Phi}{\partial t} + C_{\Phi}^y \frac{\partial \Phi}{\partial y} = \frac{\partial \Phi_S}{\partial t} + C_{\Phi}^y \frac{\partial \Phi_S}{\partial y}; \quad (5)$$

Численный метод решения задачи

Явно-неявные аппроксимации по времени Адамса Бэшфорда и Кранка-Николсон:

$$\begin{aligned} & \frac{\rho_P^{k+1}\Phi_P^{k+1} - \rho_P^k\Phi_P^k}{\tau} Vol_P + \\ & + \frac{3}{2} \iiint_{Vol_P} \left[\frac{\partial \rho U \Phi}{\partial x} + \frac{\partial \rho V \Phi}{\partial y} + \frac{\partial \rho W \Phi}{\partial z} - \frac{\partial}{\partial x} \left(K_{xy} \frac{\partial \Phi}{\partial x} \right) - \frac{\partial}{\partial y} \left(K_{xy} \frac{\partial \Phi}{\partial y} \right) - S_\Phi \right]^k dxdydz - \\ & - \frac{1}{2} \iiint_{Vol_P} \left[\frac{\partial \rho U \Phi}{\partial x} + \frac{\partial \rho V \Phi}{\partial y} + \frac{\partial \rho W \Phi}{\partial z} - \frac{\partial}{\partial x} \left(K_{xy} \frac{\partial \Phi}{\partial x} \right) - \frac{\partial}{\partial y} \left(K_{xy} \frac{\partial \Phi}{\partial y} \right) - S_\Phi \right]^{k-1} dxdydz - \\ & - \frac{1}{2} \iiint_{Vol_P} \left[\frac{\partial}{\partial z} \left(K_z \frac{\partial \Phi}{\partial z} \right) \right]^{k+1} dxdydz - \frac{1}{2} \iiint_{Vol_P} \left[\frac{\partial}{\partial z} \left(K_z \frac{\partial \Phi}{\partial z} \right) \right]^k dxdydz = 0 \end{aligned}$$
