

HONG KONG FENGLISHENG GROUP COMPANY LIMITED

About Us

Organization

History

In 2004, Goorui brand was set up with launching its single stage blowers (the power ranges from 200W to 7500W).

In 2005, Goorui was selected to apply into Qinghai-Tibet Railway project.

In 2007, Goorui double stage blower debuted in China. Goorui was also CE passed and "Dongguan Energy-saving Association's Standing Council Member" approved. ISO 9001: 2000 passed.

In 2008, following Siemens, Goorui has developed and produced its GHBG series blowers and became world's NO. 2 manufacturer of three stage blowers. "German trademark certificate" certified. "Dongguan city high technology private company" awarded.

In 2009, Goorui succeeded in its mass production of high power blowers ranging from 7.5kw and 25 kw. It accordingly proved to be China's first and World's second manufacture that produces high power blowers of widest range. Additionally, Goorui was ROHS certified.

In 2010, "Guangdong Province high technology private company" passed.

Applications

Applications

GOORUI Side channel blower widely used for more than 170 applications

Industrial Application – Top cases

Qinghai-Tibet Railway is using the GOORUI Side Channel blower

With the advantages of high temperature resistant, long life, Safty and stability , GOORUI Side channel blower was successful selected as the Tibet Railway exclusive blower in 2004.

Industrial Application – Top cases

Be with the **“Chinare” polar-exploration** spacecraft to expedite to South Pole. With the properties of safety, stability and high-cold resistance, GOORUI blower was selected to used in Chinare spacecraft with the function of air monitoring

Industrial Application – Top cases

Used on the **rescue equipment** to win more time for the emergency treatment.
Depend on its application advantages in medical field, Goorui blower is used for the oxygen-increasing equipment on the France SOS helicopter .

Service

Pre-sale service

Free technical support

Select models according to customers' requirements. Offer the tailor-made solutions for different industries and different clients.

Offer special customized blowers according to customers' special applications.

FAQ

Q: What is the rated pressure of Goorui blower?

A: The maximum vacuum of Goorui blower is 73Kpa, and the highest pressure is 100Kpa.

Q: What is the max air flow of Goorui blower?

A: The maximum air flow of Goorui blower is 2330 m³/H, and the power of this model is 25kw.

Q: How many db (noise) can the Goorui silencer reduce?

A: About 5 decibel.

After-sale service

Service hotline : [400-887-1011](tel:400-887-1011)

In warranty(1 year) : Free warranty
Out of warranty: Maintenance fee
accordingly

**Our VIP customers can have get the free
maintenance chance once a year.**

Problem solving

Quick response in Working hours.
(Monday to Friday; 8:30 am to 17:30pm)

2 Hours—Complaint will be replied within 2 hours,
and our solution will be offered within 6 hours.

24 Hours—Your technical problems will be solved
within 24 hours by Goorui engineers.

Machine maintenance:

- 1、 Completed within one working day if only need
to replace some simple parts.
 - 2、 Completed within 3 working days if the motor or
some crucial parts need to be repaired or replaced.
-

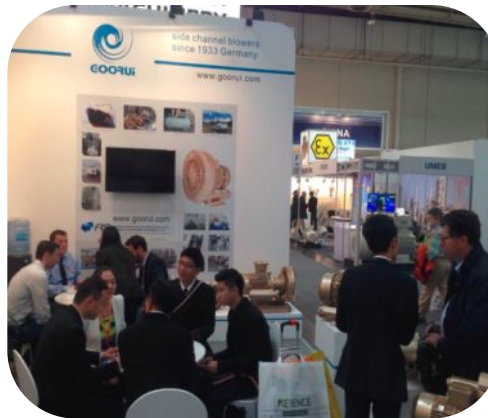

Exhibitions

Goorui has been attending Hannover Messe since 2012.
