

Задачи на готовых чертежах по Теореме о трёх перпендикулярах

Задача 1:

Дано: $\angle A = 30^\circ$, $\angle ABC = 60^\circ$, $DB \perp (\text{ABC})$

Доказать, что $CD \perp AC$

Задача 2:

Дано: $\angle BAC = 40^\circ$, $\angle ACB = 50^\circ$, $AD \perp (ABC)$

Доказать, что $CB \perp BD$

Задача 3:

Дано:1) $MA \perp (ABC)$, $AB = AC$, $CD = BD$. Доказать: $MD \perp BC$
Дано:2) $MA \perp (ABC)$, $BD = CD$, $MD \perp BC$. Доказать: $AB = AC$

Задача 4:

Дано: AE и CF - высоты, $BK \perp (ABC)$

Доказать: $KD \perp AC$

Задача 5: ABCD - параллелограмм, $BM \perp (ABC)$, $MC \perp CD$.
Определите вид параллелограмма ABCD

Задача 6: ABCD - параллелограмм, CM \perp (ABC), MO \perp BD.
Определите вид параллелограмма ABCD

$\Delta ABC, \angle C = 90^\circ, PB \perp (ABC),$

$PA = 13\text{ см}, \angle B = 30^\circ, AC = 5\text{ см}$

Найти: $\rho(P, AC); \rho(P, (ABC))$

Задача 7:

Дано: $\triangle ABC$, $BD \perp (ABC)$, $AM = MD$, M – центр описанной около $\triangle ADC$ окружности.

Найдите: $\angle ACD + \angle ACB$

Задача 8:

Дано: $AM \perp (ABC)$, $AB = AC$, $CD = DB$.

Доказать, что $MD \perp BC$

Задача 9:

Дано: $\triangle ABC$, $\angle C = 90^\circ$, O центр описанной окружности,
 $AM = MC$, $OD \perp (ABC)$, $AB = 5$, $AC = 3$.

Найдите DM .

Задача 10:

Дано: $\triangle ABC$, $AB = BC = AC$, $CD \perp (ABC)$, $AM = MB$, $DM = 15$, $CD = 12$.

Найдите S_{ADB} .

Задача 11:

Дано: $\triangle ABC$, $\angle C = 90^\circ$, $BD \perp (ABC)$, $AM = 2BD$.

Найдите $\angle 1 + \angle 2$.

Задача 12:

Дано: $ABCD$ – квадрат, $BE \perp (ABC)$, $\angle EAB = 45^\circ$, $S_{ABCD} = 4$.

Найдите: $S_{\triangle AEC}$.

Задача 13:

Дано: $\triangle ABC$, $D \in (ABC)$, $AD = BD = CD$, $\angle AOB = 60^\circ$.

Найдите: $\angle ACB$.

Задача 14:

Дано: $\triangle ABC$, $AB = BC = AC$, O - центр $\triangle ABC$, $DO \perp (ABC)$, $DO = 8$, $DC = 10$.

Найдите: S_{ABC} , расстояние от точки D до сторон $\triangle ACB$.

Задача 15:

Дано: $\triangle ABC$, $\angle ACB = 90^\circ$, $AO = OB$, $DO \perp (ABC)$, $DO = 3$,
 $DC = 5$.

Найдите: R описанной около $\triangle ABC$ окружности, AD , DB .

Задача 16:

Дано: $\triangle ABC$, $AB = BC = AC$, O - центр $\triangle ABC$, $DO \perp (ABC)$, $DM = 5$,
 $DO = 4$.

Найдите: $P_{\triangle ABC}$, AD , BD , DC .

Задача 17:

Дано: $\triangle ABC$, $AC = CB = 10$, $AB = 12$, $DM \perp AB$, $DN \perp AC$,
 $DK \perp BC$, $DM = DN = DK$, $DO \perp (ABC)$, $DO = 1$.

Найдите: DC .
