השיטה העשרונית

Dewey Decimal Classification

Melvil
Dewey
1851-1931

In visiting over 50 libraries, I was astounded to find the lack of efficiency, and waste of time and money in constant recataloging and reclassifying made necessary by the almost universally used fixed system where a book was numbered according to the particular room, tier, and shelf where it chanced to stand on that day, instead of by class, division and section to which it belonged yesterday, today and forever. Then there was the extravagant duplication of work in examining a new book for classification and cataloging by each of a 1000 libraries instead of doing this once for all at some central point."

- Melvil Dewey, "Decimal Classification Beginnings," Library Journal, 45:151 (Feb. 15, 1920).

חידושי דיווי

- מיקום יחסי

Welcome to Dewey Services™

Hello NYC EDUC !

You will be using the service in FULL mode.

→ Message of the day

Need a list of all the original cataloging your institution has done in a year? Search in Connexion, type "cs=[OCLC Symbol]" in the command line or use the dropdown menus (cs=Cataloging source) will retrieve all the records contributed to WorldCat. Your OCLC Symbol appears at the top of a bibliographic record in the message about holdings. More limiting may be needed; use the relatively new "Date created as MARC" index. The index label is "dm:" and it searches the Entered date in the OCLC Fixed Field (008/00-05). You could also limit by Material Type (mt:), Year of publication (yr:), or by Language of item (la:) to create subsets of your original records. We encourage you to explore Searching WorldCat Indexes: <http://www.oclc.org/support/documentation/worldcat/searching/searchworldcatindexes/>. The document is long, but you can use the Find command in your internet browser to search for an index label that would hit on a specific field (e.g. FIND "authentication" will locate the index label ac= to limit a search by a code in field 042 \$a). Many less common indexes are extremely useful for different situations and needs.

T1--05	Serial publications
T1--06	Organizations and management
T1--07	Education, research, related topics
T1--08	Groups of people
T1--09	History, geographic treatment, biography

History**Notes**

The following notation is never used alone, but may be used as required with any regular schedule number, e.g., workbooks ([T1--076](#) in this table) in arithmetic ([513](#)): 513.076. When adding to a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number. Unless other instructions are given, the terminal zeros in a main class or division number should be dropped before adding a standard subdivisions, e.g., journals ([T1--05](#) in this table) in mathematics ([510](#) minus the final zero): 510.5. (Full instructions on the use of standard subdivisions are found in the Introduction to the Dewey Decimal Classification)

Standard subdivisions should be added only when the work in hand covers the whole, or approximately the whole, subject of the number in the schedules

When standard subdivision notation from Table 1 is listed in Tables 2 through 6 and in the schedules, all of the notation's notes and subdivisions as given in this table are applicable unless other instructions are given. Other Table 1 notation that is not listed in the schedules may also be used. For example, the fact that [610.7](#) is listed, but not 610.8 or the subdivisions of [610.7](#), does not exclude the use of 610.8 or [610.71](#).

Do not add one standard subdivision to another standard subdivision unless specifically instructed. Standard subdivisions may be added to special notation listed in the regular standard subdivision sequence, to subdivisions of [T1--04](#) Special topics that are specifically listed in the schedules, and to displaced standard subdivisions wherever they appear. Numbers in the schedules that look as though they were built with notation from this table but are outside the regular sequence of standard subdivisions are not considered "standard" subdivisions. Hence notation from Table 1 may be added to such schedule numbers

Never use more than one zero in applying a standard subdivision unless instructed to do so. If more than one zero is needed, the number of zeros is always indicated in the schedules. If the 0 subdivisions of a number in a schedule are used for special purposes, use notation 001-009 for standard subdivisions; if the 00 subdivisions also are used for special purposes, use notation 0001-0009 for standard subdivisions

Unless other instructions are given, observe the following table of preference, e.g., communication in education and research [T1--07](#) (not [T1--014](#)):

Special topics	T1--04
Biography	T1--092

History

Notes

History and description by place, by specific instance of the subject
 The subdivisions listed in the add table below are special notation, not standard subdivisions
 Unless other instructions are given in the add table below, observe the following table of preference, e.g., a periodical of statistics [021](#) (not [05](#)):

Maintenance and repair	028
Forecasts	01
Specific continents, countries, localities	093-099
Areas, regions, places in general	091
Historical periods	0901-0905
Museums, collections, exhibits	074
Collecting objects	075
Illustrations	022
Statistics	021
Dictionaries, encyclopedias, concordances	03
History and geographic treatment (without subdivision)	09
Serial publications	05

Add to base number [T1--09](#) notation [T2--3-T2--9](#) from Table 2, e.g., the subject in North America T1--097, in Brazil T1--0981; then add further as follows:

01	Forecasts
02	Statistics, illustrations; maintenance and repair
021	Statistics
022	Illustrations
	Including cartoons, drawings, pictures, pictorial charts and designs, sketches; graphs; maps, plans, diagrams
	Class statistical graphs in notation 021 from this table
	Class humorous cartoons in T1--093-T1--099 without adding from this table
028	Maintenance and repair
	Class here conservation, preservation, restoration
03	Dictionaries, encyclopedias, concordances
	Including thesauri (synonym dictionaries)
05	Serial publications
	Regardless of form (print or electronic) or frequency
	Class here house organs, magazines, newspapers, yearbooks
07	Museums, collections, exhibits; collecting objects
074	Museums, collections, exhibits
	Class here exhibitions, fairs, festivals; catalogs, lists regardless of whether or not articles are offered for sale; guidebooks, history and description
	Add to 074 notation T2--4-T2--9 from Table 2, e.g., collections in Pennsylvania 074748, collections of Brazilian objects in Pennsylvania T1--0981074748
075	Collecting objects

Add to base number T1--09 notation T2--3-T2--9 from Table 2, e.g., the subject in North America T1--097, in Brazil T1--0981;

Development

One of Dewey's great strengths is that the system is developed and maintained in a national bibliographic agency, the Library of Congress. The Dewey editorial office is located in the Decimal Classification Division of the Library of Congress, where classification specialists annually assign over 110,000 DDC numbers to records for works cataloged by the Library. Having the editorial office within the Decimal Classification Division enables the editors to detect trends in the literature that must be incorporated into the Classification. The editors prepare proposed schedule revisions and expansions, and forward the proposals to the Decimal Classification Editorial Policy Committee (EPC) for review and recommended action.

EPC is a ten-member international board whose main function is to advise the editors and OCLC on matters relating to changes, innovations, and the general development of the Classification. EPC represents the interests of DDC users; its members come from national, public, special, and academic libraries, and from library schools.

Guidance from the experts

The Dewey Decimal Classification (DDC) Editorial Policy Committee (EPC) is a ten-member international board whose main function is to advise the DDC editors and OCLC on matters relating to changes, innovation and the general development of the DDC to make it work better for you and your library users. Nominated by various organizations, EPC members represent the interests of libraries around the world as they guide the ongoing development of the DDC.

[EPC Meeting 130 Agenda](#)

EPC members

EPC members value input from other librarians, so please contact any of them to discuss DDC-related concerns.

Member	Organization	Location	Nominated by
Andrea Kappler	Evansville Vanderburgh Public Library	Evansville, Indiana, USA	American Library Association

Jonathan Furner	University of California at Los Angeles	Los Angeles, California, USA	American Library Association
Gert de Jager	University of South Africa	Pretoria, South Africa	Sabinet Online Standards Committee (OCLC)

Editions

The DDC is published in full and abridged editions in print and electronic versions. The abridged edition is a logical truncation of the notational and structural hierarchy of the corresponding full edition on which it is based, and is intended for general collections of 20,000 titles or less. WebDewey and Abridged WebDewey, the electronic versions of the full and abridged editions, respectively, are updated frequently and contain additional index entries and mapped vocabulary. The electronic versions and supplemental web postings are the chief sources of ongoing updates to the DDC. On the Dewey web site (www.oclc.org/dewey), selected new numbers and changes to the DDC are posted monthly, and mappings between selected new Library of Congress Subject Headings (LCSH) and Dewey numbers are posted biweekly.

Rebecca Green on Papal

February 26, 2013

Papal resignation, papal election

When [Pope Benedict XVI announced his intention to resign](#) as of February 28, the whole world took notice. We took notice, too. No sooner had we learned the news than questions were going the rounds of the team:

- What would we need to do to prepare for a new pope?
- Is it really possible to distinguish cleanly between **262.1309 History of papacy** and **282.0922 Collective biography of popes**?
- What would be the number for the upcoming conclave?

So that you'll be in the know before you even need to know, let's address those questions.

First, does a new pope get a new number the same way a new president (often) gets a new number? No, the DDC does not develop the history of the papacy by ecclesiastical administrations the way that it develops the history of countries by political administrations. Instead, the history of the papacy in the 2010s would be classed, in the standard way, in **262.13090512 Roman Catholic papacy, 2010–2019** (built from **262.13 Papacy and patriarchate**, plus **T1–090512 2010–2019**). (Note the [standard-subdivisions note](#) at 262.13: "Standard subdivisions are added for . . . Roman Catholic papacy alone.")

So, is it really possible to distinguish cleanly between **262.1309 History of papacy** and **282.0922 Collective biography of popes**? Can you talk about the history of the papacy without discussing the lives of individual popes? Can you talk about the collective lives of popes without talking about the history of the papacy? Maybe not, but still we can make a case for when one number is more appropriate than the other. If the emphasis of the work is ecclesiastical, as in [The chair of Saint Peter: a history of the papacy](#), **262.1309 History of papacy** is more appropriate. If the emphasis of the work is biographical, as in [Their name is Pius: portraits of five great modern popes](#), **282.0922 Collective biography of popes** is more appropriate.

What about the process whereby a new pope is elected? What's the number for a papal conclave? The LCSH [Popes—Election](#) includes 450 fields for Conclaves—Papal and Papal conclaves, so we might assume that those two questions are driving at the same thing. But perhaps it is again a matter of emphasis. If the emphasis is on the overall process, as in [Papal elections in the age of transition, 1878-1922](#), or on the newly elected pope, as in [The making of the Pope: the selection of Pope Benedict XVI and what this choice means for Catholics today](#), **262.13 Papacy and patriarchate**, is more appropriate. But if the emphasis is specifically on the actions of the College of Cardinals, as in [Les faiseurs de papes: les cardinaux et le conclave](#) [*The makers of popes: the cardinals and the conclave*], then **262.135 College of Cardinals** is more appropriate. (Standard subdivisions can be added in either case.)

Stay current with ongoing updates to the DDC

The Dewey Decimal Classification (DDC) system is updated on an ongoing basis. Check the Dewey Web site regularly for the resources you'll need to keep your collections organized and current. These resources include [LCSH/DDC numbers of interest](#), which suggest how classifiers can treat materials in topics that were introduced after the current print edition of the DDC was published.

All libraries face myriad challenges in classifying their library materials. The Dewey editors seek the advice of Dewey users on ways to improve treatment of specific subject areas in occasional [Discussion papers](#) with instructions for returning comments. Subscribe to [025.431: The Dewey blog](#) for ongoing advice on the use of the DDC.

Your subscription to WebDewey or Abridged WebDewey includes regular updates that keep your cataloging and classification efforts aligned with the latest updates to the Dewey Decimal Classification (DDC) system. Both services contain the latest versions of the schedules, tables, Manual and Relative Index entries (print and electronic) from the respective enhanced DDC databases. The hierarchical displays in WebDewey and Abridged WebDewey feature updated main class and division captions (e.g., 700 Arts & recreation; 790 Sports, games & entertainment).

Using [WebDewey](#) you can have ongoing access to all updates to the DDC and to the complete list of LCSH/DDC postings. An [archive of new and changed entries](#) is available through OCLC's [Digital Archive](#).
