# purposes and tasks

\_\_\_\_\_

**Purpose:** to reveal the role of the English language in mechanics

**Tasks:** to reveal the importance and necessity of mastering the English language base for the unhindered performance of official duties

Многие ученики задаются вопросом для чего они учат английский язык? Ведь в будущем они не планируют переезжать за границу или контактировать с иностранцами.

Why you need to start learning English, and why it is important to do it as early as possible, this is what I want to write about in my report.

1. First of all, I would like to write that nowadays student exchange is actively practiced, and with good knowledge of a foreign language, namely English, there is a real chance to prove yourself as a good specialist.

In addition to the first point, I would like to add that in our time, the exchange of experience between specialists is also practiced.

2. Knowledge of English allows you to get much more information.  
After all, there is very little information in Russian when compared with the total amount of it. Namely, 10%, the remaining 90% in foreign languages.

3. Sociability. Foreigners really like it when visitors are able to communicate in their native language. What will allow you to gain respect and authority

#### 4. English in the workflow.

More and more enterprises are being filled with imported equipment, and knowledge of English will certainly only help you.

With knowledge of English:

Without knowledge of English:

So, summing up, I want to make the main idea of this project. The fact that English is not needed by students is A DELUSION!!! One way or another, the English language will affect everyone, it does not matter directly or indirectly.

**Спасибо  
за  
Внимание**
