

Ecological problems

Made by Denis Belov

10a

A man with glasses and a mustache, wearing a light-colored patterned sweater, stands in a chemistry laboratory. He is gesturing with his hands as if explaining a concept. In the background, a chalkboard is filled with handwritten chemical notations, including orbitals (2s, 3s, 4s, 5s, 6s, 7s) and subshells (p, d, f). To the left, a Bunsen burner is lit, showing a blue flame. To the right, there is a laboratory stand with glassware. The overall scene suggests a science lecture or demonstration.

Ecology is a science. Many sciences have such prefix. What does it mean “Eco”? “Eco” means “home” in Latin language. It’s a science about our mutual home – about nature. Science, which teaches us to treat very carefully to our homeland . Environment – is surroundings we live in .

People have always polluted their surroundings . Even in ancient times people admitted that their health was depending on the state of surroundings. But only in XX century humanity, in full measure, realized , that many diseases are closely connected with the air and water pollution and inferior products.

Ecological problems

Air pollution

Water pollution

Soil pollution

Air pollution

• Air pollution is a very serious problem, because polluted air can cause illness and even death. Every year world industry pollutes the atmosphere with about 1500 million tons of dust and other harmful substances. Many cities suffer from smog, the oxygen balance upsets. Cars are polluting the air by exhaust gases and other dangerous chemicals.

Water pollution

An aerial photograph of a coral reef. The water is clear blue over the reef, but a large, opaque, yellowish-brown plume of polluted water flows from the top left towards the center. The sky is blue with some white clouds.

**автомобили надоели
загрязнять экологию**

**предлагаю взять весь бензин
и вылить в океан**

- I. Water resources is one of the main factor of existing life in our planet
- II. People use fresh water for their needs. It is more than 2% of hydrosphere volume
- III. First of all water pollution is the result of industrial, agricultural and everyday necessities discharge of wastes into rivers, lakes and seas
- IV. The main part of water pollution plays a large number of oil industry wastes

Soil pollution

степы больше нет...

1. Soil pollution the main component of the Earth biosphere represents topsoil
2. Soil is polluted by: litter, wastes , heavy metals, pesticides, radioactive elements
3. Sinking aerosol may contain heavy poisonous metals and it may lead to plants ruin

Modern ecological problems

**GLOBAL
WARMING**

GLOBAL WARMING FAKE NEWS!!!!

RED ALERT! RED ALERT!

I DON'T UNDERSTAND

MemoFapen

- Creation of different kinds of purification plants
- Recycling
- introduce fines for waste disposal

Three yellow Minions from the Despicable Me franchise are shown from the chest up. They are all smiling broadly, showing their teeth. The Minion on the left has one large eye visible through its goggles and is waving with its right hand. The middle Minion has two eyes and is also waving with its right hand. The Minion on the right has two eyes and is giving a thumbs up with its right hand. They are all wearing their signature black goggles and blue overalls. The background is dark and out of focus, suggesting an indoor setting with other Minions in the background.
