

THE HOUSE OF MY DREAMS"

Zhetes Akmarzhan

- Home is a sweet home. When we hear the word "home", we associate it with a warm hearth of the family and a safe place where you can always relax and take a break from all the hustle and bustle of the day. This is a place where we can do whatever we want, because this is our territory, there is no commanding chief at home who is eternally dissatisfied with your work, nor annoying employees who bother you for nothing. Here you decide for yourself whether to relax or do urgent business, spend time with your loved ones, devote your free time to your hobbies, creativity, or just do a general cleaning.

"THE HOUSE OF MY DREAMS"

my conditions

For me, my home is the embodiment of warmth and comfort. This two-storey building will always be my fortress. Every time I go inside, I am greeted by the smell peculiar to my house – most often it is the aroma of my mother's homemade pastries, and the warmth emanating from my sincere family. My room plays a very important role for me. It is small, but very cozy. There are pictures of me and my loved ones on the walls, and flags of different countries. There is a bed, a bedside table, a desk and a bookcase near the window. I love to read, so his shelves are regularly replenished with some interesting new literature. I spend quite a lot of time in my room – reading, drawing, watching movies and doing my homework. Despite this, it's atmospheric to spend evenings in the living room with your parents, discussing who had a good day and what plans for the next one. My house has a very beautiful kitchen. It is in this room that Mom works culinary wonders.

The design of my castle will be built by skilled architects, the walls of the fortress are built with burnt bricks, which are famous for keeping the temperature of the walls warm in winter and cool in summer. The windows of the great hall will be so large that they will have a wonderful view of the whole city. There will be a garage outside the castle, which is originally built into the wall.

There is a very beautiful garden behind our house. In summer, I like to go out and sit in the gazebo, enjoying the evening coolness. Also, we have incredibly beautiful roses growing in our garden, which my mother takes care of so diligently. Petunias, hydrangeas, cornflowers, daisies – all these flowers decorate our farm. My favorite tree in our yard is an old apricot. It's funny to note that he grew up with me, because Dad planted him when I was born. During the season, mom always collects fruits from it and makes jam. I always help my father with the housework in the yard, because there is always a lot of work going on there in the summer. We often roast kebabs with him – such a traditional summer dish in our family. Also, we have a swimming pool and that's why sometimes I invite friends to my place.

The geographical location of my future home is very good. After all, the castle is located on a hill outside the city, away from traffic and factories. The sounds of cars and other noises won't bother me. I like the future picture of my house that I imagined, because the house should suit the state of the soul.

THANK YOU!
