5a Predictions

I'm sure life in 2100 will be very different. The earth will be so polluted that we won't be able to live on it anymore. It will be difficult to find clean water and lots of animals and plants won't exist anymore. I think we will live in glass domes in underwater cities and will travel in special mini-submarines.

Mark (13)

I think life will change for the better in 2100. Everyone will have a robotic teacher that will do all the homework and look after the kids. We will also have robotic teachers and if you don't want to go to school, you won't have to because there will be online schools.

Jessica (13)

I think that we will be able to take the moon in 2100. A space shuttle will go to the moon to look at a few things. There will be space cities on the moon and people will live there. Space exploration will be very important. People will live on the moon. But it's not easy to go to the moon. It will be better for the planet.

Chris: Hey Bridget Where are you going?
Bridget: Hi, Chris. I'm on my way to buy a virtual pet.
Chris: What are you talking about? What is a virtual pet?
Bridget: Well, my mum says I can't have a real dog. I'm going to get a computerised one.
Chris: A computerised dog?
Bridget: Yes, Chris, I'm going to buy a puppy, feed it, and train it. All I have to do is push buttons on the gadget!
Chris: So when your virtual dog is hungry, you push a button that shows you are feeling hungry. Exactly! There is a button for walking, take care of it every day.
Chris: Oh, come off it! It won't be because it won't show you an

5c HIGH TECH TEENS

Teenagers spend a lot of time in their bedrooms. Lugging out with them, but your average teenager's bedroom has changed a lot in the past few years.

Up until recently, teenagers had teddy bears, dolls, sports equipment, tape recorders, board games and the odd radio in their bedrooms. Nowadays, their bedrooms' toys are all big game and innovations such as MP3 music players and games consoles.

A recent survey showed that when a lot of ten babies were born a while ago, their parents had a TV, a radio, a computer, a mobile phone and a laptop. And now, their parents have a TV, a radio, a computer, a mobile phone, a laptop, a tablet, a DVD player, a game console, a MP3 player, a camera, a digital music player, a GPS, or a computer (PC) or a laptop.

So, it's not surprising that when a lot of ten babies were born a while ago, their parents had a TV, a radio, a computer, a mobile phone, a laptop, a tablet, a DVD player, a game console, a MP3 player, a camera, a digital music player, a GPS, or a computer (PC) or a laptop.

They pay for them! What else out of the box have they got? Well, they have a TV, a radio, a computer, a mobile phone, a laptop, a tablet, a DVD player, a game console, a MP3 player, a camera, a digital music player, a GPS, or a computer (PC) or a laptop.

Some parents might be shocked to find out that their children or teenagers could be sleeping on a gold mine. It seems far to say that in their bedrooms.

I think that we will be able to take holidays on the moon in 2100. A moon shuttle will travel from the Earth to the moon in only a few hours. There will be moon hotels where people can stay, and moon zoos where we will see strange creatures. People will wear special suits that keep them on the ground. But I'm not sure everyone will have enough money to go on a holiday to the moon.

Jake (14)

What is pollution?

damage caused to water, air, etc. by harmful substances or waste

I will do all the housework and look after the kids. We will also have robotic teachers and if you don't want to go to school, you won't have to because there will be online schools.

I believe we will have flying cars and we will be able to fly around cities. If we have flying cars, there won't be any traffic jams. I also think that there won't be any petrol left, so we will use another fuel that won't cause pollution. It will be better for the planet.

Which prediction do you think will come true?

How can we talk about predictions? Read the sentences, then the rule.

I'm sure life in 2100 will **be very different**.

I think we will live in glass domes
in underwater cities and will travel in special
mini-submarines.

if you don't
want to go to school, you won't have to because
there will be online schools.

But I'm not sure everyone will **have**
enough money to go on a holiday to the moon.

*I **believe** we will have flying cars and we will be able to fly
around cities.*

*If we have flying cars, there won't be any
traffic jams.*

- We use **will** to make predictions about the future based on what we think or imagine. We often begin our sentence with the words: *I think, I'm sure, I believe.*

***I think** life **will be** very different in 2100.*

- We use the Present Simple after **if** and **when**, not the Future Simple.

if/when + Present Simple

***If/When** I go to Spain, I **will take** lots of
photographs.*

NOT: ~~*If/When I will go to Spain, ...*~~

Ask and answer the questions.

1. people / go on holiday / to the moon?

- Will people go on holiday to the moon?
- I (don't) think they will. They will ...

2. people / drive / flying cars?

- Will people drive flying cars?
- Yes, I think people will drive flying cars.

3. computers / talk?

- Will computers talk?
- Yes, I think computers will talk.

4. time travel / be / common?

- Will time travel be common?
- No, time travel won't be common.

5. people / live / in underwater cities?

- Will people live in underwater cities?
- No, I don't think people will live in the underwater cities.

Put the verbs in brackets into the future simple or the present simple.

1. If people .. **invent** new fuel, cars .. **won't pollute** the air.

2. When John .. **comes** we .. **will go** to the park.

3. If he .. **has** a lot of money, he .. **will buy** a computer.

4. If you **exercise** more, you ... **will feel** better.

5. If we .. **are** lucky, we .. **will go** on a holiday to the moon one day.

Ex. 6. Fill in the sentences with will or won't. Listen to John making predictions.

- 1 I'm sure robots **will** .. do most of the housework.
- 2 There **won't** be many plants and animals left on the planet.
- 3 I think the earth **will** be very polluted in 2100.
- 4 If we continue to pollute the earth **won't** be any clean water left.

**script**

John: I think the world will be a very different place in 2100. I'm sure that robots will do most of the housework for us so we can spend more time playing and having fun. But, I think there won't be many plants and animals left on the planet so we'll have to find new types of food. I also think the earth will be very polluted and maybe we'll have to wear masks. What I'm really afraid of is that if we continue to cause pollution, there won't be any clean water left and we'll have to go to other planets to find water.

Ex. 8. Writing. Portfolio.

What are your predictions for the future?

Use ideas from Ex. 1 as well as your own to write a short text similar to the ones on p.46.

You can draw pictures.

**Suggested Answer Key**

I think that we will discover other planets and we will go on holidays there. I also think that everybody will have their own robot that will do all their work for them and we will have more time to play. However, I don't believe that we will have robot teachers because we will always need real teachers.
