- **Ingredients:**

- ***Vaccinium Myrtillus Fruit Extract (Europe Blueberry)***

- Blueberry contains anthocyanosids and polyphenols as antioxidant compounds, which are great for protecting eyes and maintaining vision. These compounds can improve microcirculation and maintain retinal function, and are effective in improving blood flow to the retina of the eye, and also indicated in people with macular degeneration, cataracts, diabetic retinopathy and increase their vision at night.
- Help support eye health by antioxidants, anti-inflammatory, collagen stabilizer, vascular protection. Helps improve vision and strengthen blood vessels behind the eyes. Besides, contain vitamin A good for eyes, improve the health of the mucosa and cornea, enhance eyesight, protect the eyes against bacterial or virus infections.

- ***Andrographis paniculata herba extract (Sambiloto)***

- *Andrographis paniculata* has the property of lowering blood glucose so that it can prevent diabetic retinopathy. The active compounds which are active are deoxyandrographolide, neoandrographolide, 14-deoxy-11-12-didehydroandrographolide and homo-andrographolide. This andrographolid compound can reduce the activity of glucose formation from non-carbohydrate compounds such as pyruvate and lactate. *Andrographis paniculata* can also stimulate the phagocytosis of white blood cells so as to increase immunity. *Andrographis paniculata* test results also show that sambiloto has anti-bacterial, anti-fungal and anti-inflammatory properties.
