

The conflict of generations

The conflict of generations is the appearance of differences between people of different ages. The most vivid examples can serve as a situation of communication between children and parents, grandmothers, grandfathers. However, the main role here can play not only teenagers and their relationships with the older generation but also their parents in communicating with their mothers and fathers. Often it's a generational thing called – the conflict between fathers and children.

The reasons that provoke such conflicts, quite a lot. But of all possible to allocate the most frequent. These include different views on the following points: the nature of philosophy (attitude to education, career, family, positive and negative features of people, the role of modernity, etc.); education of children; relax zone; the comfort zone (clothes, appliances, food, etc.); health; Finance and much more.

A simple answer to the question, what impact the conflicts of generations, impossible. Large role played by a number of factors: the degree of importance of the essence and peculiarities of the nervous system interlocutors. However, probably the biggest role is played by where they occur.
