SOME FACTS ABOUT PROFESSIONS

All professions and occupations are divided into 5 types according to the character of work: man-man, man-machines, man-symbols, man-object of art and man-nature.

Social pulls say that the most popular reasons of choosing this or that occupation are: prestigiousness, high salary, interesting work, good working conditions, availability of training. The last place takes the advice of parents or friends.

WHY DID YOU CHOOSE THIS KIND OF PROFESSIONS ?

MODEL:

I think, I can work in the man-man sphere, because I like (prefer, would like, fond of) looking after little children.

Test yourself

Psychologists say that a preferable child's toy shows his abilities and future profession. Is it true?

If a child prefers to play with puzzles, cubes he is a future mathematician, a programmer, a system administrator or an architect.

If he usually plays with soldiers, he is a future leader.

If he usually plays with cars, he won't be a leader, he will choose a profession of a worker.

If a child prefers to play with soft toys, it means he has humanitarian abilities. He will become a journalist, social worker or he will study languages.

If his favorite toy is a dinosaurs, he will be good at biology, chemistry or physics.

If a boy often plays with dolls, it is better to consult a psychologist.

If a girl likes to play with "boys' toys" such as cars, she is very emotional and impulsive.
