

# ВВЕДЕНИЕ +

- ◎ Space exploration was the greatest achievement of the 20th century

An astounding number (of) discoveries were made in the 20th century. Space exploration is considered to be the most significant revelation from all of them by some people while others do not share this viewpoint.

- ◎ The most significant of them is considered by some people to be

При перефразировании указываем 20 век

Space exploration is considered by some people to be the most significant revelation of those that were made in the 20<sup>th</sup> century

# REVELATION

- ◎ The **revelation** of something is the act of making it known
- ◎ Прилагательные с которыми можно ИСПОЛЬЗОВАТЬ
- ◎ **amazing, astonishing, devastating, embarrassing, sensational, shattering, shock, startling, sudden | fresh, latest, recent | divine**

## МНЕНИЕ АВТОРА +

- ◎ In my opinion, the research of space is really the most important achievement of the last century. Firstly, space exploration has given people more knowledge about the Universe than any of other existing sources. Due to space stations first photos of planets and other celestial bodies were taken and people finally found out what they look like. Secondly, space exploration has led to the development of new technologies. For instance, a sputnik connection has provided communication between people from different parts of the world, a navigation system made it possible to forget about inconvenient compasses and maps.

## МНЕНИЕ ОППОНЕНТА +-

- ◎ However, not all (the) people share my viewpoint. They believe that space exploration has not affected all people **to the same extent** . If a person is not a scientist or a professor then this knowledge will never be useful to him
- ◎ To the same extent as\_\_\_\_\_ не завершена мысль
- ◎ this knowledge лучше точнее представить какие именно знания
- ◎ На мой взгляд не хватает точности в аргументах

# ОПРОВЕРЖЕНИЕ АРГУМЕНТОВ ОППОНЕНТА +

Nevertheless, I do not agree with this **statement** (the reasons given by opponents) . Almost everyone uses the technologies that we have owing to space exploration. For instance, GPS or sputnik TV (предложение должно быть подлежащее и сказуемое – или присоединить к предыдущему)

## ЗАВЕРШЕНИЕ +

- ◎ Taking into consideration different opinions,  
I am still convinced that space **exploration is (was)** the greatest accomplishment of the 20th century as it has allowed people to find out the necessary information for making new discoveries and give an opportunity for further development.
