

CO2 Reduction

Here is where your project
proposal begins

Contents of This Template

Here's what you'll find in this **Slidesgo** template:

1. A slide structure based on a project proposal, which you can easily adapt to your needs. For more info on how to edit the template, please visit **Slidesgo School** or read our **FAQs**.
2. An assortment of pictures that are suitable for use in the presentation can be found in the **alternative resources slide**.
3. A **thanks slide**, which you must keep so that proper credits for our design are given.
4. A **resources slide**, where you'll find links to all the elements used in the template.
5. **Instructions for use**.
6. Final slides with:
 - The **fonts and colors used** in the template.
 - More **infographic resources**, whose size and color can be edited.
 - **Sets of customizable icons** of the following themes: general, business, avatar, creative process, education, help & support, medical, nature, performing arts, SEO & marketing, and teamwork.

You can delete this slide when you're done editing the presentation,

06

Our Company

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than the Moon. The planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god

01

About the Project

You could enter a subtitle here
if you need it

What We Are Working On?

Project 1

Despite being red, Mars is actually a cold place full of iron oxide dust

Project 2

Jupiter is a gas giant and the biggest planet in the Solar System

Project 3

Saturn is a gas giant, composed mostly of hydrogen and helium

Where Are We Working In?

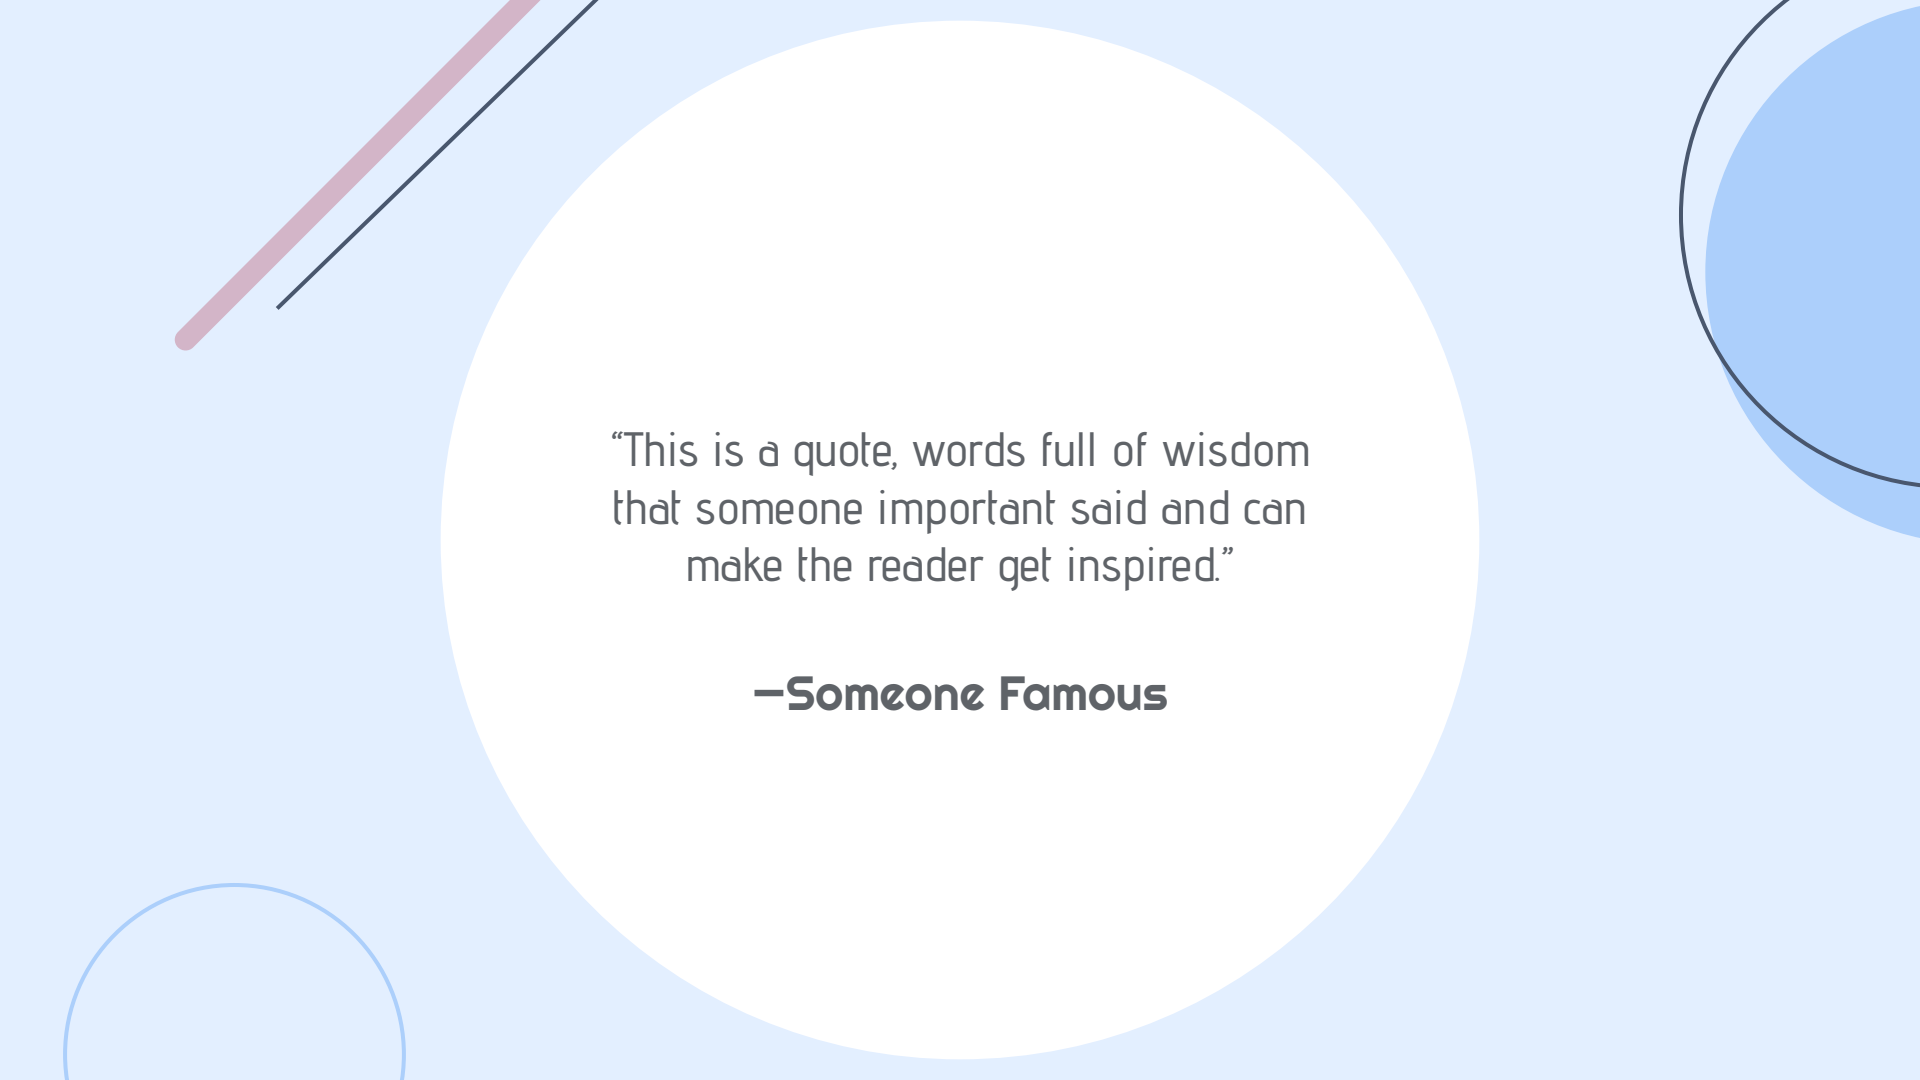

About the Project

Project 1

- Here you can write about the project

“This is a quote, words full of wisdom
that someone important said and can
make the reader get inspired.”

—Someone Famous

Now

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

Future

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

Major Requirements

Mars

Despite being red,
Mars is a cold place

Jupiter

It's the biggest
planet of them all

Saturn

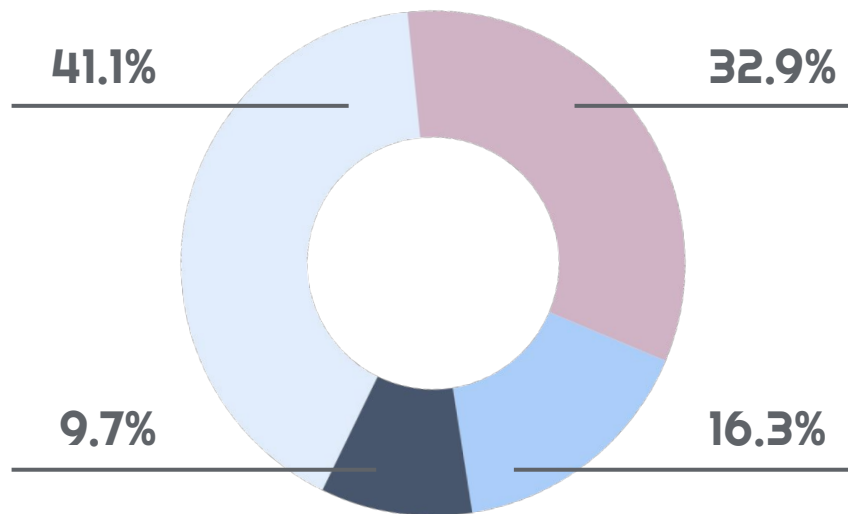

It's a gas giant and
has several rings

Venus

Venus is the second
planet from the Sun

Budget

Despite being red,
Mars is a cold place,

Jupiter is a gas giant
and the biggest planet

Saturn is a gas giant
and has several rings

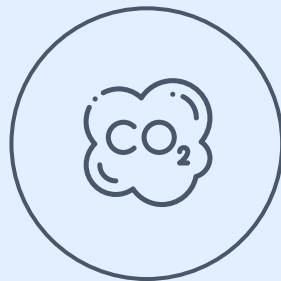

Venus is the second
planet from the Sun

Project Goals

Goal 1

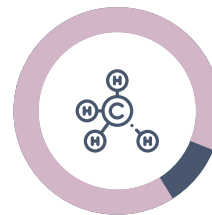

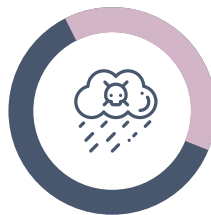

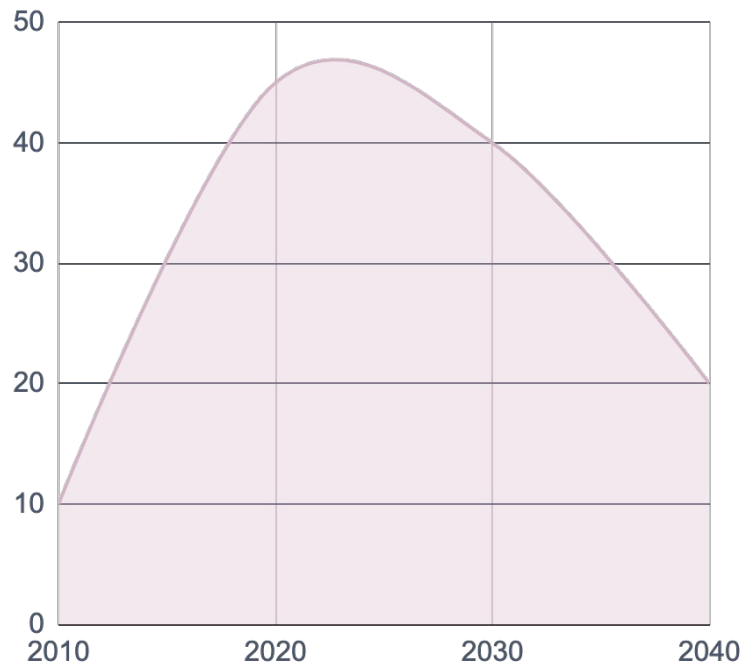

Mercury is the closest planet to the Sun and the smallest one in the Solar System

Goal 2

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot

Predicted Results

Mercury

Saturn

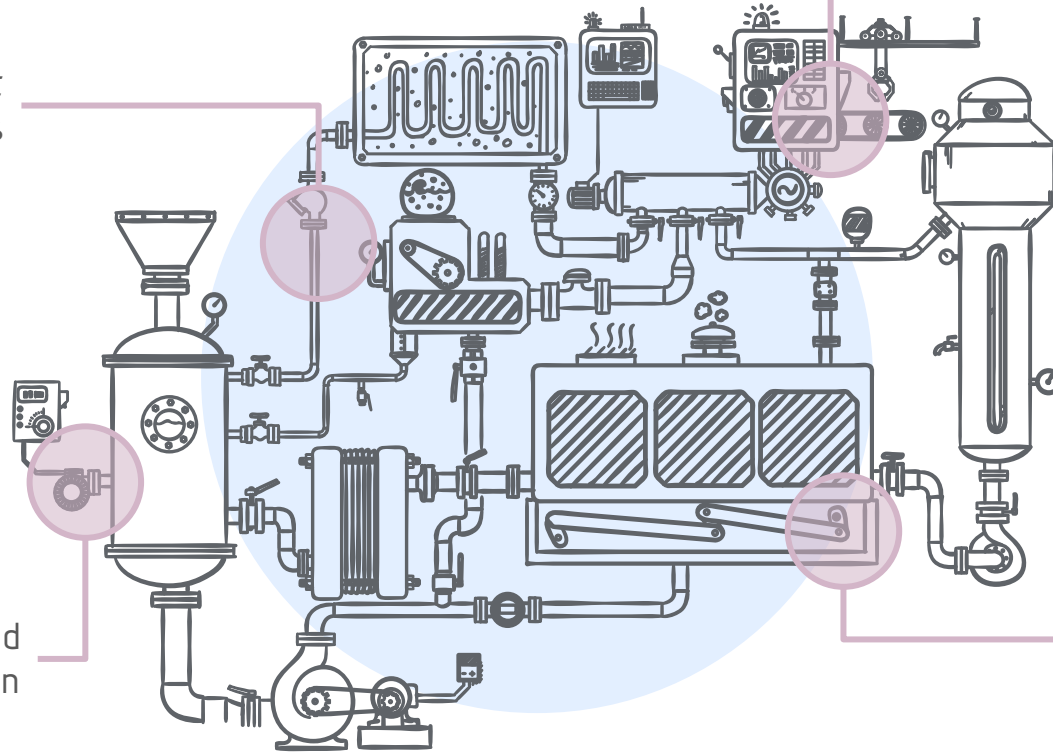

To modify this graph, click on it, follow the link, change the data and paste the new graph here

Sneak Peek

Saturn is a gas giant
and has rings

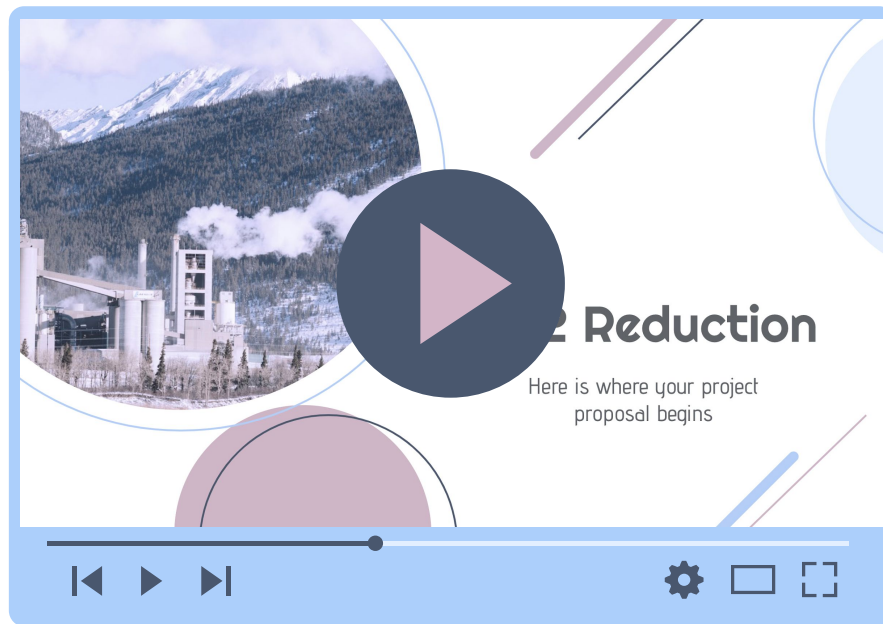

Despite being red,
Mars is cold

Venus is the second
planet from the Sun

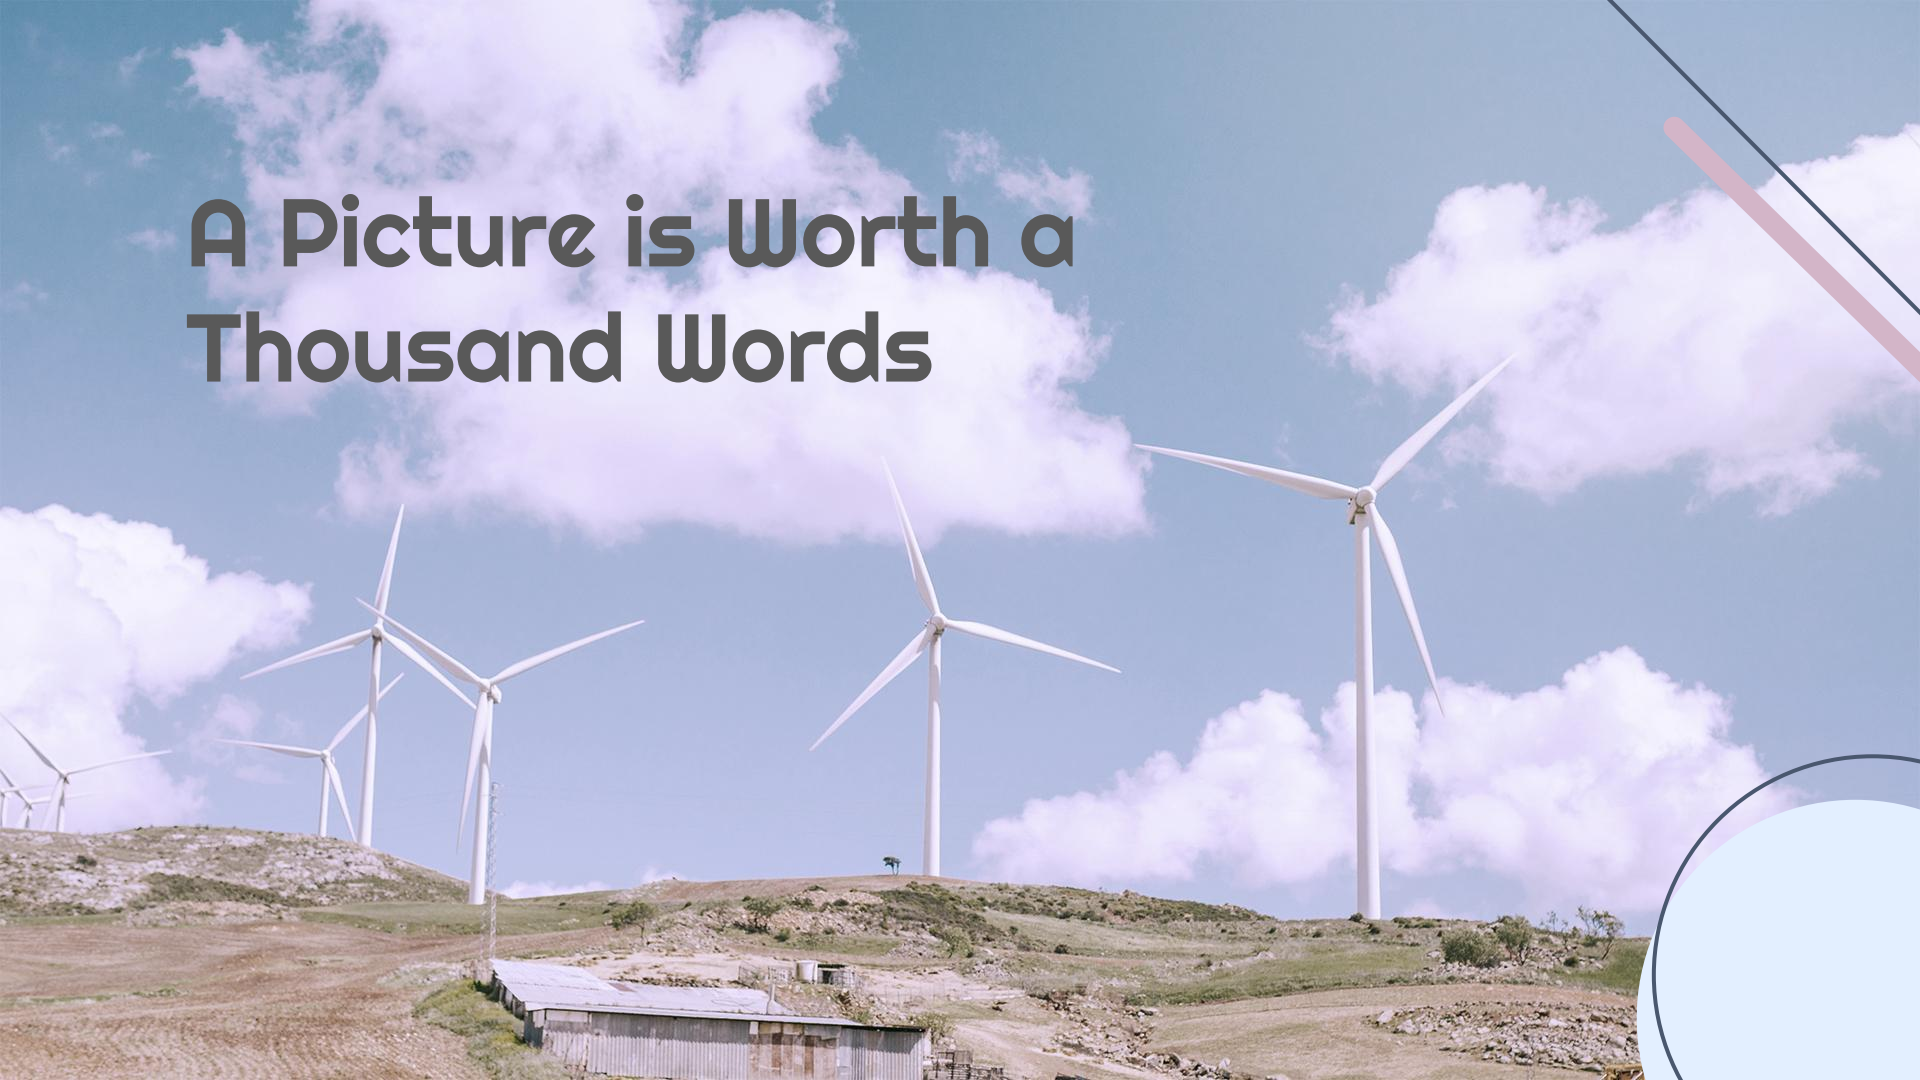

Jupiter is the biggest
planet of them all

Sneak Peek

A Picture is Worth a Thousand Words

Project Stages

60%

Stage 1

Mercury is the closest planet to the Sun

30%

Stage 2

Venus is the second planet from the Sun

10%

Stage 3

Saturn is composed of hydrogen and helium

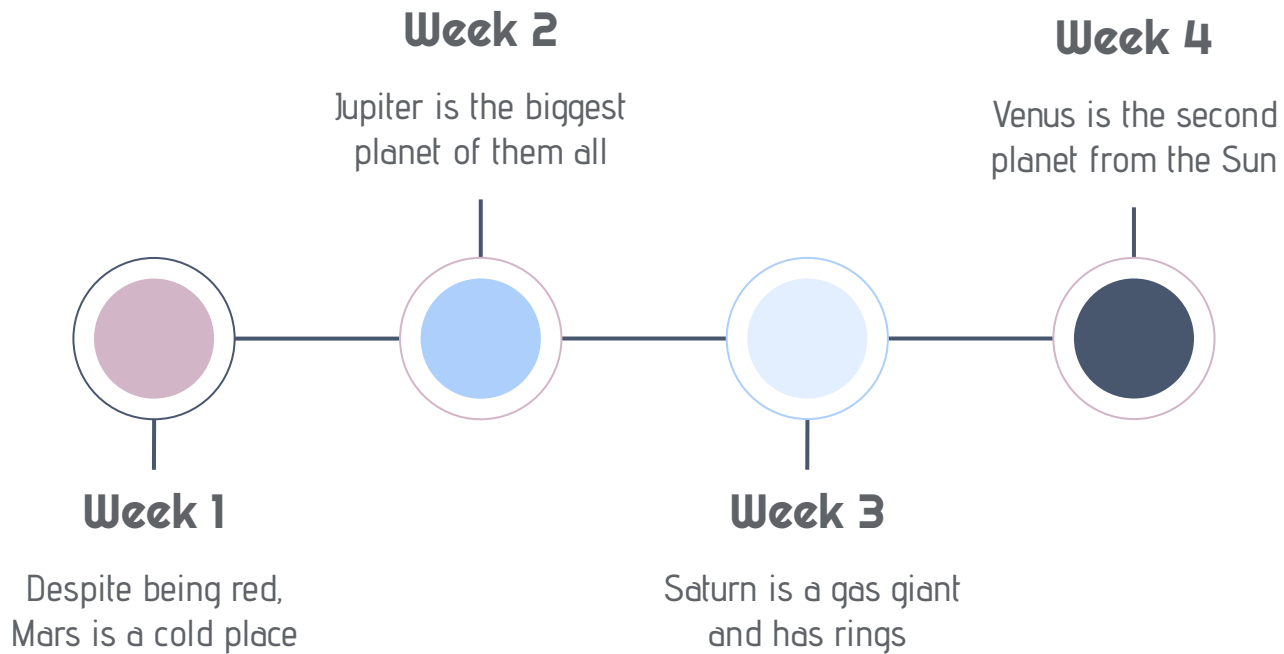

75%

Big numbers catch your
audience's attention

Tasks

	Phase 1	Phase 2	Phase 3
Task 1	Despite being red, Mars is a cold place	-	-
Task 2	-	Jupiter is the biggest planet in the Solar System	-
Task 3	-	Venus is the second planet from the Sun	Saturn is the ringed one and a gas giant
Task 4	-	-	Mercury is the closest planet to the Sun

Timeline

Our Partners

Mercury

Mercury is the closest planet to the Sun

Venus

Venus has a beautiful name, but it's terribly hot

Mars

Despite being red, Mars is actually a cold place

Jupiter

It's the biggest planet in the Solar System

Saturn

Saturn is the ringed one and a gas giant

Neptune

Neptune is the farthest planet from the Sun
