

1. Name: Global tour (TRW)

Introduction: Global travel (TRW) is an app that exists in TripAdvisor and its subsidiaries. The app contains a very large global tourism community. Through the two-tier management mode of MyEclipse 6.5 + MySQL 5.1 database, the third-party Intelligent Cloud control host matches the booking platform. At present, the platform cooperates with Ctrip, Priceline, Expedia, trpadvisor and other booking platform tourism agencies to match global tourist attractions to platform users through the intelligent MyEclipse 6.5 + MySQL 5.1 database system, So as to improve the trading volume and popularity of tourist attractions on major platforms, so as to achieve the purpose of advertising for global tourist attractions, Global travel (TRW) is a platform connecting our real users and global travel agencies. We help travel agencies promote scenic spots and enhance the popularity. Tourists go to scenic spots to buy tickets, and travel agencies make money. Travel agencies share the platform and the platform gives us commissions, which also promotes the internal cycle of the global tourism economy.

1. Name: Global tour (TRW)

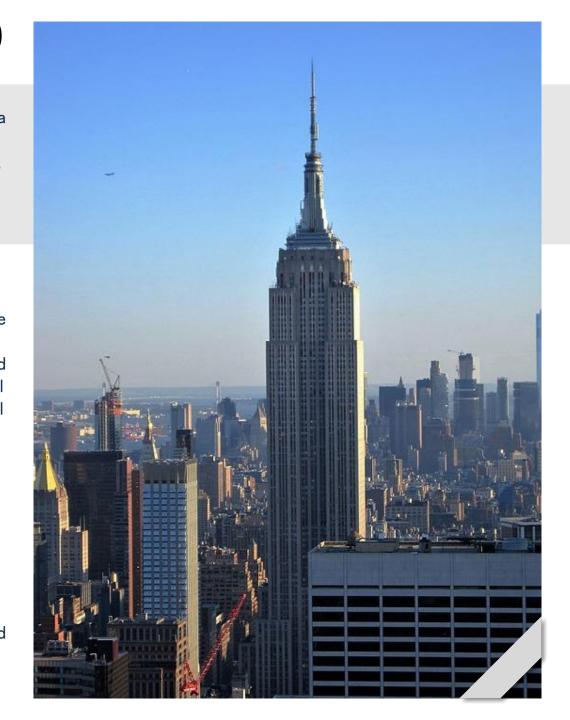

Significance: using the trend of modern Internet, the mode of cumbersome advertising and high cost of traditional tourist attractions is improved. Through the two-layer management mode of the system MyEclipse 6.5 + MySQL 5.1 database, the third-party intelligent data control host matches the tourism booking platform, and the booking is automatically submitted by the remote intelligent database server. The platform users only need to provide the real receiving address on the platform, When the mobile phone number and some real shopping information are transmitted to the Intelligent Cloud host, the intelligent cloud can control the remote computer robot to automatically simulate the manual order submission operation process, making the online shopping order matching more efficient and simple.

1. Name: global tour (TRW)

Summary: TRW was established on September 5, 2012. After nearly 10 years of testing, improvement and improvement, it has become a leading e-commerce platform in Southeast Asia. Its business covers Indonesia, Malaysia, the Philippines, Singapore, Thailand, Vietnam, European and American markets, etc. every day, the platform will put on the platform the package of tourist attractions that need to improve their exposure, It is provided to platform users for reservation, so as to improve the popularity of tourist attractions. According to the user's account balance matching order, the higher the account balance is, the higher the matched ticket price is, the higher the income will be. The laws of tourism regulatory departments all over the world stipulate that users are true and effective. New users need to improve their personal real information and fill in their real address before booking. Enable tourist attractions to upload real and effective booking information when increasing exposure and popularity, so as to avoid false information data. So as to promote the benign and healthy development of global tourist attractions everywhere. In order to effectively improve the exposure and popularity of tourist attractions, avoid criminals registering multiple accounts for arbitrage, and affect the fair rights and interests of users, the platform system will optimize the backup according to the current operation IP and equipment model. All user information will be kept private and confidential. The authenticity and effectiveness of all users and the existence of illegal arbitrage will be verified from time to time through the system MyEclipse 6.5 + MySQL 5.1 database to ensure the fair rights and interests of all users.

2. How to operate

Recharge: because TRW involves global tourist attractions, you need to convert your country's currency into the world common currency usdt through the exchange used in your country (currency security, fire currency, Ouyi, etc.), and use the exchange to transfer and recharge usdt in the "recharge" interface of the platform. Fill in the recharge amount and click "submit". The system will randomly match the required recharge amount (e.g. 100.66). Be sure to transfer and recharge according to the system matching amount (100.66), and then obtain the wallet address of the platform.

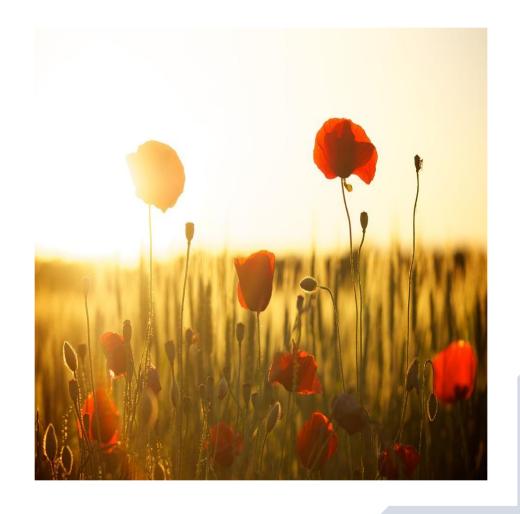

2. How to operate

Reservation: after completing the personal real data and real address in the app and recharging the account, you can make a reservation. Click "automatic reservation" and wait for the system to match the reservation. In order to avoid delaying the progress of other users to improve the popularity of tourist attractions, global tourism companies stipulate that after the reservation is successful, you must submit the order within 3 minutes, otherwise the order amount will be temporarily frozen, According to the user's reputation, you can apply to the customer service for unfreezing, which will be unfreezed automatically after 24 hours.

2. How to operate

Withdrawal: after booking the number of order tickets for the corresponding room, bind your exchange wallet and necessary information in the app. Withdraw in the withdraw interface. Fill in the withdrawal amount and withdrawal password for withdrawal. The account will arrive before 24:00 the next day.

3. Revenue mode

Booking task: the revenue is calculated based on the percentage of the ticket price of the matched tourist attractions according to the reservation of the platform users in the corresponding rooms. The order amount is 10% - 70% of the platform's random default user account balance to generate orders (1. Ctrip revenue matches 0.18% of each ticket price: 2. Priceline revenue matches 0.22% of each ticket price; 3. Expedia revenue matches 0.28% of each ticket price; 4. Trpadvisor revenue matches 0.39% of each ticket price). The more the account principal is prepared, the higher the price of the matched order and ticket, and the higher the income. Revenue will be obtained immediately after each confirmation is submitted. The platform will feed back 90% of the promotion expenses of global tourism agencies to users for each order submitted by platform users. The platform will only charge 10% as the service and operation expenses of the platform.

4. Level 4 team revenue

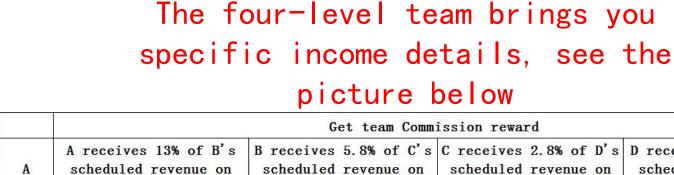

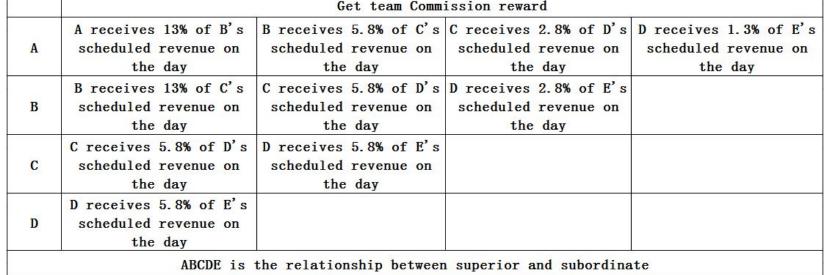

Users of this platform can recommend new people to become your offline agent by using the invitation code, and can obtain additional dynamic rewards. The agent mode of the platform is the four-level agent mode of [zero investment]. TRW (Global Travel) app cooperates with tourism agencies. In order to enable more users to help scenic spots advertise with the trend of modern Internet, we hereby apply to the local tourism association for successful launch "Zero investment four level agent mode" every user can become an agent. Sharing friends' participation can obtain four level team income.

The platform agent model and team income are as follows:

Your primary agent brings you 1.3% team revenue Your secondary agent brings you 5.8% team revenue Your three-tier agent brings you 2.8% team revenue Your level 4 agent brings you 1.3% team revenue

4. Level 4 team revenue

When e develops his own team, he can also get the income of level 4 agent. Level 4 agent is applicable to each agent. There is no pyramid. It is possible that you will exceed the income of your superiors through the joint efforts of yourself or those who motivate the team, and each agent can only get the income of level 4. (all the revenue generated from the graded awards is generated by the platform, which does not affect the revenue booked by the platform users every day, and the direct dynamic awards are settled to the account after 24:00 every day)
