

AIR POLLUTION

A photograph of an industrial facility, likely a port or refinery, with two prominent black smokestacks emitting thick, billowing clouds of white and yellowish smoke that rise into a hazy, orange-tinted sky. In the background, a body of water is visible with several large gantry cranes and industrial structures along the shoreline. The overall scene conveys a sense of heavy industrial activity and environmental impact.

WHAT IS AIR POLLUTION?

Air Pollution – A type of environmental problem, that affects the air.

Caused by :

AIR POLLUTION CLASSIFICATION

POLLUTION CAN BE:

Gas

Liquid

Solid

Where does air pollution come from?

WHAT DISASTERS DOES AIR POLLUTION CAUSE?

WHY AIR POLLUTION IS BAD FOR OUR HEALTH?

AIR POLLUTION CAUSES SUCH ILLNESSES AS:

Allergy

Bronchitis

HOW TO REDUCE AIR POLLUTION?

Walk or ride a bike when it is possible

Take public transportation. More vehicles mean more air pollution.

Drive less.

IN CONCLUSION

Air pollution is a serious problem that you need to get rid of right now, otherwise there will be serious consequences from this. So people need to take care of the earth.

A wide-angle photograph of a sprawling industrial complex, likely a steel mill or refinery. Numerous tall, cylindrical smokestacks are visible, many of which are emitting thick, white plumes of smoke that rise into the air. The sky is filled with these smoke clouds, creating a hazy, overcast atmosphere. The industrial structures themselves are dark, with various pipes, walkways, and scaffolding visible. The overall scene conveys a sense of large-scale industrial activity and its environmental impact.
